Making this year as eventful as a year can be, the Emirates Environmental Group organized their Annual public speaking competition on April 25th at Knowledge Village Auditorium, that nevertheless served as an ideal platform for facilitating an exchange of ideas among the student fraternity. The ADHS team of 5 students - Anandita Noronha, Ria Rajan, Hiba Adil, Yashaswini Vadrevu, and Tanushri Warrier participated in the sub-senior category. They were accompanied by their EM teacher Ms. Samarpita Roy.

The active participants mesmerized the audience with their vibrant oratory skills. There were two topics: “Climate Change: impact on water security” and “Alternative energy resources: a viable option?” Our students opted for the second topic.
The event was inaugurated by the EEG’s chairperson, Ms. Habiba Al Marashi. The speeches were divided into two batches for each topic, of which our school were in the second batch. Many schools took a different approach as they started off their presentations with dance performances, skits, and singing performances.

The experience of participating on such a platform was not only awe-inspiring but also immensely valuable in terms of the awareness we gained on various issues plaguing our planet. The platform brought together the youth who debated and discussed various aspects, and shared their diverse opinions, ideas and strategies to tackle the problems. The forum also presented many unique and innovative initiatives practiced to create awareness among the youth and helped create a profound perspective of the issues relating to our environment. We were ranked 5th out of twenty-four schools. The opportunity to meet and witness students of our age with so much to learn from their skill is pleasantly exciting.
